THE SEEDS AND PLANT REGULATIONS 2010

ARRANGEMENT OF REGULATIONS

PART 1 – PRELIMINARY

1. Title
2. Objectives of these Regulations
3. Interpretation

PART II - VARIETY TESTING, RELEASE AND REGISTRATION

4. Application for Variety Testing
5. Testing Duration
6. Preparation of technical data
7. Variety Release
8. Variety Registration
9. Publication in the Gazette

PART II 1 - REGISTRATION OF SEED MERCHANTS

10. Application for Registration of Seed Merchants
11. Issuance of Certificate of Registration
12. Duration and Renewal of Certificate of Registration
13. Register
14. Responsibility of Seed Merchant

PART IV - REGISTRATION OF SEED GROWERS AND SEED PRODUCTION

15. Seed Classes
16. Application for consideration as a Seed Grower
17. Registration of Seed growers
18. Seed Crop production

PART V - FIELD CROP INSPECTION

19. Application for Field Inspection
20. Field Inspection
21. Inspection Report
22. Farm stock approval
23. Refusal to approve seed crop
24. Transportation

PART VI - SEED PROCESSING AND CONDITIONING

25. Seed Processing
26. Seed conditioning
PART VII – SEED SAMPLING
27. Seed sampling
28. Dispatch of samples

PART VIII- SEED TESTING
29. Seed Testing procedures
30. Test Report
31. Sample storage
32. Repeal on seed testing results

PART IX- SEED LABELING AND SEALING
33. Seed labeling and sealing procedures
34. Protection of seed certification labels

PART X - VALIDITY OF CERTIFICATION
35. Validity of Certification and quality declaration
36. Disposal of sub-standard seed

PART XI- SALE OF SEEDS
37. Conditions for sale of seed
38. Seed dealers, agents, subagents or stockists
39. Validity of Seed Dealers certificate
40. Maintenance of Seed Dealers Register
41. Declaration of seed stocks

PART XII- SEED IMPORT /EXPORT
42. Conditions for Seed Import
43. Conditions for Seed Export

PART XIII- POST CONTROL TESTING
44. Post Control Management

PART XIV- INTER- AGENCY SEED CERTIFICATION
45. Inter-Agency Seed certification

PART XV- ACCREDITATION
46. Accreditation
47. Conditions for Accreditation
48. Accreditation Procedures

PART XVI- Offences and Penalties
49. Offences and Penalties

PART XVII- APPEALS
50. The Seeds and Plant Tribunal
51. Appeals to the Tribunal

PART XVIII- MISCELLANEOUS PROVISIONS
52. Protection of officers from civil action

THE SEEDS AND PLANT REGULATIONS 2010

(Under Section 28 of the Seeds and Plant Act, Act No. 3 of 2006)

IN EXERCISE of the powers conferred upon the Minister responsible for Agriculture, by section 28 of the Seeds and Plant Act 2006, and on recommendation of the National Seed Board, these Regulations are made this… day of…… 2010

PART 1 – PRELIMINARY A

1. Title
   These Regulations may be cited as the Seeds and Plant Regulations.

2. Objectives of these Regulations
   The objective of these Regulations are to promote, regulate and control plant breeding, variety release, multiplication, conditioning, marketing, importing and quality assurance of seeds and other planting materials and for other related matters.

3. Interpretation
   In these Regulations, unless the context otherwise requires:-
   “Act” means the Seeds and Plant Act No. 3 of 2006

   “Accreditation body” means the sole national accreditation body recognized by government to assess, against National standards, other organizations that provide seed certification services such as seed testing, field crop inspection, seed sampling, seed sealing. For purpose of these Regulations, such a body is National Seed Certification Services.

   “Accreditation” means third party attestation related to a conformity assessment body conveying formal demonstration of its competence to carry out specific conformity assessment tasks.

   “Basic seed” means seed produced from breeder’s seed or from pre-basic seed, under the supervision of the plant breeder or his/her agent, under joint evaluation by National Seed Certification Services. For this purpose, Basic seed is also
Foundation seed.

“Board” means the National Seed Board.

“Breeder’s seed” means seed of a particular variety produced by the Breeder (owner) of the variety or his/her agent, under the plant breeder’s supervision, which is the source of the initial and recurrent increase in seed production of the variety.

“C1” means the first generation of certified seed.

“C2” means the second generation of certified seed.

“Certified seed dealer/Certified seed merchant” means any person or institution certified to produce and sell certified seed.

“Certified seed” means a class of seed produced under a certification program from basic seed or seed of higher classes. Certified seed can be of two generations (C1, C2).

“Compulsory certification” means mandatory certification for those varieties that have been tested in National performance trials, officially released and entered into the National list of varieties or the common catalogue as indicated in the Second Schedule of these regulations.

“Currency point” has the value assigned to it in these Regulations.

“Distinctness, Uniformity and Stability tests” mean evaluations to determine whether a new plant variety is different from any known plant variety in respect of some trait(s); uniform in morphological, physiological or other accepted traits; and stable in its description after repeated reproduction or propagation.

“Farm stock approval” means a final inspection in which moisture content; varietal purity, disease, insect damage and yield of a seed crop are assessed and approved before delivery to the factory for processing.

“Field inspection” means an examination of a seed crop, including checking for isolation, hectarage of the seed field, off types, foreign varieties and diseased plants as part of the seed certification program.

“Genetic value” means the inherent genetic value incorporated into the variety by the breeder.

“Germinated seeds” mean seed lots in respect of which in the course of a germination test have produced seedlings with normal growth characteristics of the shoot and root systems.

“Imported seed” means a quantity of prescribed seed authorized by the Minister to be imported into the country for
commercial or experimental purposes.

“Inter-Agency seed certification” means a seed certification process that involves more than one certifying agency.

“Isolation” means the required distance or time between two crops of the same species or between two crops of too closely related species to prevent contamination either mechanically or by pollination.

“ISTA” means International Seed Testing Association, an association for ensuring uniformity in seed testing in the laboratory.

“Label” means Tag/Identification Tag affixed on container to identify the seed

“Labeling” means the process of affixing a tag or identification marks so as to ensure correct identification of any container of seed.

“Minister” means the Minister responsible for Agriculture.

“Ministry” means the Ministry responsible for Agriculture.

“National Seed Certification Service” means the technical body responsible for seed certification and quality assurance.

“National Seed Testing Laboratory” means an official seed testing laboratory, which is designated to carry out official seed tests and to issue seed test results in respect of national and international seed trade.

“National Variety List” means an official list of seed varieties released by the National variety Release Committee, and are eligible for seed production.

“Off type” means a plant of the same species which does not exhibit the characteristics of the variety being grown for certification.

“Official seed analyst” means an officer designated to test seed samples by the Minister under the provisions of these Regulations.

“Official seed sample” means a seed sample taken by an official seed sampler in accordance with these Regulations.

“Official seed sampler” means an officer designated to carry out seed sampling by the Minister under the provisions of these Regulations.

“Organization for Economic Cooperation and Development” means a group of countries whose objective is to promote international seed trade by standardizing the regulations for the field varietal certification of seed.

“Parental material” means the propagating material from which breeder’s seed is produced.

“Post control testing” means the growing of plants from seed lots which have been certified to further determine and confirm varietal purity and freedom from disease infection and
verify the effectiveness of a certification program.

“Private sample” means any sample submitted to the official seed testing laboratory other than the official sample.

“Private seed analyst” means a seed analyst not designated by the Minister to test seed samples under the provisions of these Regulations.

“Private seed sampler” means an officer not designated to carry out seed sampling by the Minister under the provisions of these Regulations.

“Pure germinating seed” means the proportion of pure seed in a seed lot capable of germinating into normal seedlings under optimum germination conditions.

“Purity” means the percentage by weight of pure seeds in a given sample as determined by a purity analysis in the official seed testing laboratory.

“Record” means any record required to be kept under these Regulations.

“Registered seed grower” means a person or institution officially recognized by the Ministry to grow seed crops.

“Sealing” means the stage in processing whereby a seed container is sealed by NSCS to prevent any tampering.

“Seed conditioner” means a person engaged in the business of cleaning, treating or otherwise conditioning seeds intended for sale and is registered to do so by the Ministry.

“Seed dealer” means a person who trades in seed and is registered to do so by the Ministry.

“Seed dressing” means a stage of seed processing where application of chemical substances on the surface of seed is done for the purpose of controlling pests and diseases.

“Seed health” means the degree of freedom from seed-borne diseases and pests.

“Seed importer” means a person authorized to import seed.

“Seed industry” means the entire linked activities that start with breeding and crop improvement through; multiplication, processing, certification and ends with seed distribution and marketing.

“Seed inspector” means a person authorized by the Minister to inspect seeds.

“Seed lot” means a specified quantity of seed which measures to a maximum weight prescribed by ISTA, and which is represented by one sample in laboratory seed testing or in control plots, and which is homogenous and physically identifiable by a unique reference number.

“Seed merchant” means a person or organization engaged in the business of seed production, conditioning and marketing and is registered to do so by the Ministry.
“Seed processing” means all those treatments that the seed is subjected to other than laboratory seed testing, between harvesting and sale.

“Seed production” means all the operations leading up to and including final harvesting of the seed from the seed crop field.

“Seed quality” means the sum of all factors such as varietal purity, seed health, germination, moisture content and vigor which affect the performance of the seed crop.

“Seed storage” means a stage in seed conditioning in which seed is maintained under conditions that minimize deterioration.

“Seed testing” means the laboratory examination of a sample of seed to determine its quality.

“Seed” means that part of the crop which is used for propagation either as a seed in botanical sense which is developed from a fertilized ovule or a seedling; or some other parts such as a corm, cutting, bulb, root scion, tuber or stem, which is not a seed in a botanical sense, and which is used for vegetative propagation.

“Standard Seed” means any seed which is not grown under a certification program but which may be allowed by the Seed Board to enter the market in case of shortage of certified seed and meets the same laboratory seed testing standards as certified seed.

“Technical grounds” means grounds for appeal in cases of rejection in seed production where an inspector does not consider all the factors of the seed crop prior to rejecting the crop.

“Test report” means a seed testing laboratory report made after testing a sample of seed submitted officially or privately.

“Tested seed” means an official seed lot in respect of which there are valid laboratory test certificates.

“The Common Catalogue” means the list of varieties that have been tested in more than one country and are eligible to be grown in those countries.

“The seed crop” means a crop that is grown for the specific purpose of producing certified seed.

“Variety” means a population of plants which have common ancestors and have certain characteristics and when reproduced sexually or asexually retain their distinguishing characteristics.

“Variety registration” means the process of entering a variety on the National Variety List.

“Variety release” means making available to the public a variety for seed multiplication and use.

“Variety testing” means the scientific evaluation of the variety through field and/or laboratory analysis for assessment
of its genetic characteristics for agricultural use

“Voluntary certification” means certification requested by a seed producer for any of the species in the Second Schedule of these Regulations.

“Weed” means any plant or type of species different from a crop species growing in or near a registered seed crop so as to constitute a threat to the registered seed crop or the seed produced from it.

PART 11 – Variety Testing, Release and Registration

4. (1) Any person who intends to have a variety tested in national performance trials and distinctness, uniformity and stability (DUS) shall apply to the Board by filling Form SR 1, specified in the Third Schedule.

(2) The application referred to in sub regulation (1) shall be accompanied by the required seed samples and prescribed fees to cover the costs of conducting the trials.

(3) The applicant must, in applying for variety testing, show evidence of high performance of the variety in yield trials and on farm trials.

(4) The fees for testing a variety is specified in the Fourth Schedule.

Testing duration

5. (1) Any variety which is intended to be released for seed multiplication shall be tested for two main growing seasons before release.

(2) Testing of varieties shall be conducted to determine:-
   (a) Value for cultivation and use; and
   (b) distinctness, uniformity and stability (DUS)

(3) The evaluation of varieties for distinctness, uniformity and stability and national variety performance trials shall be conducted in the recommended agro-ecological zones for one and two seasons respectively by National Seed Certification Services (NSCS).

(4) The National Seed Certification Services shall independently carry out national variety performance trials in accordance with the established standards and protocols related to variety performance trials.
(5) Variety testing may be delayed by an extra season or year if the samples are not delivered in time for the planting season.

**Preparation of technical data**

6. (1) The breeder and DUS officer shall generate, analyze and compile DUS and NVPT test data into a technical report.

(2) The technical report shall be submitted and presented to the National Variety Release Committee for consideration during variety release.

**Variety Release**

7. (1) Any person who intends to have a variety released shall apply to the National Variety Release Committee by filling Form SR2, specified in the Third Schedule.

(2) An application for variety release shall be accompanied by the registration fee specified in the Fourth Schedule

(3) The National Variety Release Committee shall base its decision to release the variety on the recommendation of the technical data provided by the breeder and the DUS officer.

(4) The decision of the National Variety Release Committee on the report shall be communicated to the institution or individual responsible for that candidate variety.

**Variety Registration**

8. (1) Any variety that has superior agricultural value, as determined by the National Variety Release Committee, shall be released and registered in the National Variety List and Common Catalogue.

(2) The National Variety Release Committee shall upon release of the new variety notify the applicant in Form SR3, specified in the Third Schedule.

**Publication in the Gazette**

9. (1) The national variety list shall be published in the official gazette on approval by the Board.

(2) Any new variety published in the gazette is eligible for seed multiplication and marketing as stipulated in the release
conditions.

**PART 111 - Registration of Seed Merchants**

**Application for registration of seed merchants**

10. (1) A person who intends to produce seed in Uganda shall apply for registration to the Board.

(2) The application referred to in sub regulation (1) shall be in Form SR 4 specified in Third Schedule.

(3) The Board shall approve for registration, an applicant who meets the following conditions:

   (a) seventy-five per cent of their business is either in seed processing, production or marketing;

   (b) he has adequate trained and competent personnel knowledgeable in seed related matters;

   (c) he has established an extensive and comprehensive seed distribution channel of registered agents, subagents and stockists;

   (d) he has installed all equipment necessary for seed processing and storage.

**Issuance of certificate of registration**

11. (1) The Board shall, on registration of a seed merchant cause to be issued to him a certificate of registration in Form SR 5, specified in the Third Schedule.

(2) The certificate issued under sub-regulation (1) shall specify such conditions as may be necessary with respect to the production, processing or marketing of the seed.

**Duration and renewal of certificate of registration**

12. (1) A certificate of registration issued under regulation 11 (1), unless earlier suspended or cancelled, is valid for a period of one year from the date of issue and may be renewed for a further period not exceeding one year upon payment by the holder of a renewal fee.

(2) The fee for renewal of a certificate of registration is specified in the Fourth Schedule.
Register

13. (1) An applicant who is registered and has been issued with a certificate of registration under regulation 11 shall be entered into the register of seed merchants and assigned a registration number.

(2) The register of Seed Merchants shall be kept by the Secretary to the Board.

Responsibility of the seed merchant

14. (1) A registered seed merchant shall—

(a) record such particulars of each seed lot tested and certified seed produced, purchased, sold or otherwise dealt with by him as may from time to time be prescribed;

(b) keep such records in safe custody for a period of three years from the date of the transaction to which the records relate;

(c) produce such records to any inspector for inspection whenever required during normal working hours;

(d) be obliged to call an inspector to re-sample seed lots whose validity of certification has expired for further re-testing, re-labeling and re-sealing.

PART IV – SEED PRODUCTION

Seed Classes

15. (1) There is established by the Board, for the purposes of seed production and marketing five seed classes as follows:-
   a) breeder seed;
   b) basic seed;
   c) certified seed first generation;
   d) certified seed second generation; and
   e) standard seed.

(2) Each seed class shall be identified by a unique color of the seed label, as specified in the Fifth Schedule.
Application for Consideration as Seed Grower

16. (1) Any person who intends to be considered as a seed grower shall apply to the Board in Form SR 6, specified in the Third schedule.

(2) An application for consideration as a seed grower shall be accompanied by the fee prescribed in the Fourth Schedule.

(3) The Board shall not approve any application for consideration as a seed grower if the application relates to land in which during the preceding season, other cultivars of the crop or closely related crops have been grown.

Registration of Seed Growers

17. (1) An applicant shall on being successful under regulation 16 (1) and upon payment of the fee prescribed in the Fourth Schedule be registered as a seed grower.

(2) The Secretary shall on registration of the applicant issue the applicant with a certificate of registration in Form SR 7, specified in the Third Schedule.

(3) The owner of the registered seed crop shall be the registered seed merchant but with respect only to the seed of the registered crop.

(3) The Secretary shall keep a record of all registered seed growers.

Seed Crop Production

18. (1) A registered seed grower shall plant the appropriate parent seed for seed production and shall keep a record of such parentage including certificates, labels and invoices as the Secretary may direct.

(2) A registered seed crop shall not exceed the approved hectarage by more than ten per cent of the total area.

(3) The Board shall permit only one or two cultivars of the same species on any farm except where the Board directs otherwise.
PART V – FIELD CROP INSPECTION

Application for field inspection

19. (1) A seed grower or merchant shall, two weeks after planting a seed crop apply for inspection of the seed crop by completing Form SR 8, specified in the Third Schedule.

(2) The application shall be accompanied by the fee prescribed in the Fourth Schedule.

(3) Upon receipt of the application, the Secretary shall issue a certificate of registration of seed crop inspection and notify the seed grower in Form SR 9, specified in the Third Schedule.

Field inspection

20. (1) A field inspection shall be conducted by official seed inspectors for the purposes of certification.

(2) Inspection shall be confined to registered seed growers’ fields and the fields of advanced breeder’s lines which have potential for the release as cultivars.

(3) A seed inspector shall have the power of entry into any field registered for field inspection.

(4) A seed inspector conducting a field inspection shall not certify any crop if he is satisfied that it does not meet the standards specified in the Sixth Schedule.

(5) The seed inspector shall carry out field inspection in such a manner that the portion of the crop being inspected is being regarded as representative of the whole crop.

(6) Seed crop inspection shall be carried out in accordance with the standards specified in the Sixth Schedule.

Inspection report

21. (1) A seed crop inspector shall issue the results of each routine field inspection in Form SR 10 A specified in the Third Schedule.

(2) The seed crop inspector shall issue a final inspection report upon completion of the final field inspection in Form SR 10 B specified in the Third Schedule.
Farm stock approval

22. (1) The registered seed grower shall keep the harvest from an approved registered field separate while in his possession.

(2) The bags, bins, or bulk storage unit shall be clearly labeled for identification and traceability purposes.

(3) One or more inspections of the seed harvested from the approved fields shall be carried out for the following-
   a) to check the storage condition;
   b) to check on the identity of the harvested crop;
   c) to estimate yield; and
   d) to determine the moisture content.

(4) An official seed sampler shall conduct farm stock approval by taking representative samples of the harvested seed crop for laboratory test.

(5) The results from the laboratory test shall form the basis for approval or rejection by the National Seed Certification Services and those results shall be issued in form SR 11 specified in the Third Schedule.

Refusal to approve seed crop

23. (1) The seed inspector shall not approve a seed crop if-

   a) the species or varietal purity of the crop is sub-standard or obscure, or
   b) the seed crop does not conform to the required standards for the species and variety concerned,
   c) any field exceeds the actual stated acreage by a percentage more than ten when physically measured.

Transportation

24. (1) The seed inspector shall, on completion of harvesting by the seed grower supervise the transportation of seed for processing, by issuing a seed transport order, in Form SR 12 specified in the Third Schedule.

(2) The seed containers used for transportation shall be clearly marked with indelible ink to avoid any contamination.
PART VI – SEED PROCESSING AND CONDITIONING

Seed Processing

25. (1) Only registered seed merchants shall process seed.

(2) A registered seed merchant shall be allowed to have for processing only seed from fields that have been approved, or seed permitted to be imported into Uganda in bulk.

(3) A registered seed merchant shall notify the Secretary before processing any seed lots; and upon such notification, the Secretary or a person authorized by him shall issue a work order to the seed merchant, in Form 13 specified in the Third Schedule.

(4) The Secretary or a person authorized by him may enter and inspect the premises of any seed merchant processing seed.

(5) The seed inspector shall during processing of seed perform machine inspection and lot examination, and order reprocessing where he considers that processing is ineffective.

(6) The seed merchant shall ensure that processed seed is clearly marked and stored separately in identifiable lots.

(7) A seed merchant shall pay the lot examination fees specified in the Fourth Schedule.

Seed conditioning

26. (1) A registered seed conditioner shall abide by the rules and seed standards specified under these Regulations for the type of seed they are conditioning.

(2) A registered seed conditioner shall not process any seed lot for which no farm stock approval has been granted by the National Seed Certification Service.

(3) A registered seed conditioner shall be responsible for the maintenance of the identity and quality of the seed lot.

(4) Seed that has been conditioned shall be put into lots; the quantity of the seed lots shall be determined by the National Seed Certification Service in accordance with the ISTA standards.
(5) A registered seed conditioner shall pack conditioned seed and shall ensure that containers are-
   (a) put into lots and stored separately; and
   (b) protected against rodents, insects, moisture and any other factors that may be harmful to seed viability.

(6) The registered seed conditioner shall keep and maintain records of the following activities carried out by him in relation to seed lots conditioned in his premises-
   (a) seed intake (quantity);
   (b) seed drying (% moisture);
   (c) seed cleaning (% screenings);
   (d) seed grading;
   (e) seed treatment (chemicals used);
   (f) seed packaging (type and numbers); and
   (g) seed storage.

(7) The seed conditioner shall produce the records referred to in sub regulation (6) on demand by the official seed inspectors.

(8) The seed standards referred to in sub regulation (1) are specified in the Sixth Schedule.

PART VII – SEED SAMPLING

Seed sampling

27. (1) Only seed from a registered seed crop that has been conditioned, in accordance with these Regulations shall be sampled for laboratory tests and post control testing verification plots.

(2) All processed seed lots shall be sampled by a seed inspector, or seed sampler designated by the Minister, upon payment by the seed merchant or seed grower of the fee prescribed in the Fourth Schedule.

(3) Seed lots shall be created at the time of sampling and shall not exceed the maximum weights prescribed by the ISTA standards.

(4) Crops from different fields of the same origin, species and cultivar which have passed field inspection may be blended and bulked to constitute one seed lot.
(5) The seed merchant shall arrange the packages in such a manner as to enable the seed inspector reach all packages and draw samples.

(6) Seed sampling shall follow the methods and procedures prescribed in ISTA standards.

(7) All the samples shall bear a unique seed lot reference number for traceability purposes.

(8) The seed merchant shall provide reliable scales for ascertaining the weight of a seed lot.

(9) The fee for sampling seed lots is prescribed in the Fourth Schedule.

**Dispatch of samples**

28. (1) Seed samples that have been obtained by an official seed inspector shall be subdivided into three component parts, loaded onto containers and sealed by the seed sampler.

(2) Each seed sample shall be accompanied by the information contained in Form SR 14 A, specified in the Third Schedule.

(3) The sealed seed samples shall then be sent to the official seed testing laboratory for:
   (a) laboratory analysis;
   (b) post control planting; and
   (c) holding as a reserve sample.

(4) Private seed samples shall be delivered to the seed testing laboratory by the owner, and shall be accompanied by information contained in Form 14B specified in the Third Schedule.

**PART VII1 - SEED TESTING**

**Seed Testing procedures**

29. (1) Seed testing for the purpose of certification shall be carried out in an official seed testing laboratory by official seed analysts in accordance with section 13 of the Act.

(2) Two categories of seed samples shall be tested in the laboratory-
(a) official seed samples, drawn and submitted by an official seed sampler or seed inspector, and
(b) private seed samples, submitted by either farmers or private individuals to the national seed testing laboratory for own use, and not for commercial purposes.

(3) Seed testing shall be conducted in accordance with the prescribed ISTA rules.

Test Report

30. (1) The official seed analyst shall :-

(a) test seeds in accordance with the procedures for seed testing, as prescribed by ISTA standards.

(b) record the results of the seed test on a certificate in SR 15A in the case of official seed samples, or Form SR 15B in the case of private seed samples, as specified in the Third Schedule;

(c) state whether the tested seeds have met the minimum standards of germination capacity, purity and health as set out in the Sixth Schedule and whether they are marketable;

(d) furnish the results of the seed testing to the seed merchant in a test certificate or to the private individual as a test report;

(e) furnish a special report where the lot has been tested for unique seed health.

(2) All test reports of private seed samples shall be stamped with the following words “Not for Sale”- own use only”.

Sample Storage

31. (1) Seed samples shall be retained and stored in the official seed testing laboratory, under optimum storage conditions, for at least twelve months from the date the test result certificate is issued.

Appeal on seed testing results

32. (1) Any person aggrieved by the results of the official seed test may appeal to the Commissioner for crop protection who may order a retest on the original sample submitted.
(2) If the results of the second test are-
   (a) within tolerance, the aggrieved person shall be required
to pay the fee prescribed for retesting; or
   (b) out of tolerance, the official laboratory will issue a
certificate bearing the new result.

(3) The results obtained from the national seed testing
laboratory together with the field inspection report shall enable
the commissioner to grant or not to grant certification of the
seed lot.

(4) Where the aggrieved person is not satisfied with the repeat
test, he shall appeal to the Board.

PART IX – SEED LABELING AND SEALING PROCEDURES

Seed labeling and sealing procedures

33. (1) Seed certification shall include labeling and sealing and
shall be subject to the payment of the fee specified in the
Fourth Schedule.

(2) Seed lots shall not be labeled or sealed before the release of
the official laboratory test result certificate.

(3) Certified seed lots which have met the minimum standards
specified in the Sixth Schedule shall be packed in bags or
containers and securely closed.

(4) All containers of seed shall be labeled with a certification
label whose serial number shall be entered into the work order
used in processing seed.

(5) The seed certification label in sub regulation 4 shall specify the-
   (a) Crop;
   (b) Variety;
   (c) seed class;
   (d) seed lot number;
   (e) net weight of seed in the package or container;
   (f) warning of poisonous seed dressing;
   (g) name and address of certifying agency; and
   (h) date of testing.

(5) Seed certification labels shall be attached to the seed
containers under the supervision of an official seed inspector.
(6) The seed conditioner shall stamp on the seed packets the following words “plant by date”.

(7) Where certified seed lots have been returned for repackaging, the repackaging shall be done only with the approval of the Secretary and under the supervision of an official seed inspector.

(8) A person, other than the ultimate user, shall not remove labels, seals or open mechanically sewn or closed packets of seed.

(9) Labeling and sealing shall not be conducted for seed packets of less than five kilograms in weight provided-

(a) that the seed is drawn from sealed containers;

(b) packets or containers are sealed or closed;

(c) the phrase “certified” is printed on the packet or container;

(d) the lot number, date of sampling, cultivar name and species name is printed on the packet or container; and

(e) a warning text, in cases where the seed lot is dressed is printed on the packet or containers.

Protection of seed certification labels

34. (1) Seed certification labels shall remain the property of the Government of Uganda.

(2) Seed certification labels shall only be issued to seed producers upon payment of the fee specified in the Fifth Schedule.

(3) Seed Certification labels shall be issued on inspection and certification of the seed lots by official seed inspectors.

PART X – VALIDITY OF CERTIFICATION

Validity of certification and quality declaration

35 (1) The validity of certification for cereals, pulses, oil crops and fiber crops is, unless earlier revoked by the National Seed Certification Service twelve months from the date of testing.
(2) The validity of certification for herbage grass, legumes, root crops, vegetables and stimulant crops shall be six months from the date of testing.

(3) The validity of certification, in the case of soybeans is, unless earlier revoked by the National Seed Certification Service six months from the date of testing.

(4) A declaration of quality for all other species of crops unless earlier revoked is valid for twelve months from the date of testing.

(5) The seed merchant or his agent is responsible for calling an inspector to conduct re-sampling, re-testing and re-sealing of seed lots whose validity of certification has expired.

Disposal of Sub-standard seed

36. (1) Any seed that is offered for sale, but upon laboratory seed testing and analysis, does not conform to the standards specified in the Sixth Schedule shall be disposed of in a safe environmental manner.

(2) Sub-standard seed shall be disposed of at the cost of the owner in a gazetted area and under the supervision of an official seed inspector or his representative.

PART XI – SALE OF SEEDS

Conditions for Sale of Seeds

37. (1) Seed shall not be offered for sale unless it has been officially tested in the official seed testing laboratory and certified in accordance with these Regulations and has had its quality declared under regulation 35.

(2) A seed of the species in the Second Schedule shall not be offered for sale unless it has been tested and certified.

(3) The seed merchant shall, in accordance with sub regulation 37 (1) be responsible for the quality of any seed he offers for sale.

Seed Dealers, agents, sub-agents/stockists

38. (1) A seed merchant shall appoint a seed dealer, agent, sub-
agent and stockists with knowledge, ability and appropriate facilities to maintain the quality and viability of the seed offered for sale.

(2) A seed dealer, agent, sub-agent or stockists appointed under sub-regulation (1) shall apply for registration to the Board by completing Form SR 16 specified in the Third Schedule.

(3) The Board shall, upon receipt of an application under sub-regulation (2), and on payment of the fee prescribed in the Fourth Schedule issue a seed dealer, his agent, sub-agent or stockist a certificate in Form SR 17, specified in the Third Schedule.

(4) A person shall not sell seed unless he holds a valid certificate issued under this regulation.

(5) An official seed inspector shall be allowed by the seed dealer to enter and inspect any premises where seed is stored for sale.

(6) A seed inspector or seed analyst shall, on a seasonal basis conduct sampling and re-testing of all seed stored for sale by a registered seed dealer, and shall issue an order to stop sale in respect of seed lots whose germination capacities are below the minimum standards prescribed by the National Seed Certification Service specified in the Sixth Schedule.

(7) Where an order to stop sale under sub-regulation (6) has been issued, the seed merchants shall retrieve the affected seed lots from all agents, sub-agents and stockists, and shall declare all such seed to the National Seed Certification Service for destruction, under the supervision of the seed inspector.

(8) The order to stop sale referred to in sub-regulation (6) is in Form SR 18 specified in the Third Schedule.

**Validity of seed dealers’ certificate**

39. (1) The conditions relating to the maintainance of seed to be exposed for sale shall be attached to the certificate issued under sub-regulation 38 (3).

(2) A certificate of the seed dealer, his agent, sub-agent or stockist shall be valid for twelve months from the date of issue,
and shall be renewed every year.

(3) The Board may withdraw the certificate referred to in sub-regulation (1) where the attached conditions are breached.

(4) The Board may vary the duration of validity as it may deem necessary.

Maintenance of seed dealers’ register

40. (1) The Secretary shall maintain a register of all seed dealers registered under these regulations.

Declaration of seed stocks

41. (1) A seed merchant shall be required to submit to the Secretary the quantity of seed held in stock every year in May and December.

PART XII – SEED IMPORT/EXPORT

Conditions for seed import

42. (1) A person shall not import seed for commercial purposes unless-

(a) he is a registered seed merchant or seed dealer in accordance with regulation 11 and has applied to the Secretary for an import permit;
(b) he has submitted a notice of intention to import seed in Form SR 19 specified in the Third Schedule, and has been issued with an import permit in Form SR 20 specified in the Third Schedule.
(c) the variety to be imported complies with the minimum standards, specified in the Sixth Schedule and the variety is included on the National Variety List or the Common Catalogue;
(d) such seed shall be imported in a form that allows easy sampling.
(e) seed for research/experimental purposes shall require only a phytosanitary certificate;
(f) Seed imported into the country shall be declared upon arrival for verification.

(2) The notice under sub- regulation 42 (1) (b) shall specify the crop, variety and quantity of seed to be imported.
(3) The marketing of imported seed shall be subject to the provisions of Regulation 37.

(4) All imported seed for commercial purposes shall be accompanied by an ISTA Orange International Certificate, an Import Permit and a Phytosanitary Certificate.

**Conditions for seed export**

43. (1) A person shall not export seed unless;

   (a) he is a registered seed merchant or seed dealer and has applied for an export permit;
   (b) he has submitted a notice of intention to export seed in Form SR 19 specified in the Third Schedule, and has been issued with an export permit in Form SR 20 specified in the Third Schedule.
   (c) the variety to be exported complies with the minimum standards, specified in the Fourth Schedule, and the variety is included on the National Variety List or the Common Catalogue;
   (d) such seed shall be exported in a form that allows easy sampling.

(2) The notice under 43 (1) (b) shall specify the crop, variety, class and quantity of seed to be exported.

(3) All seed for export shall be accompanied by an ISTA Orange International Certificate, an export Permit and a Phytosanitary Certificate.

**PART XI – POST CONTROL TESTING**

Post Control Management

44. (1) Seed lots officially sampled and tested under these Regulations shall be grown in post control plots in accordance with OECD or internationally recognized regulations relating to field seed certification scheme.

(2) The post control plots referred to in sub-regulation (1) shall be open to examination and assessment by all interested parties.

(3) An officer in charge of examination and assessment of the post control plots shall, upon completion of the examination and assessment write a report on the post control test.

(4) The report shall include-
(a) the number of off types;
(b) foreign varieties;
(c) weeds;
(d) diseased plants; and
(e) other diversions and possible remedies to eradicate such diversions in subsequent seasons, including recommendation on withdraw of remnant of seed lots found in these tests to deviate grossly from the original certification results.

PART XIV – INTER-AGENCY SEED CERTIFICATION

Inter-agency seed certification

45. (1) All seeds produced and certified by more than one certifying agency for purposes of international seed trade shall undergo inter-agency seed certification.

(2) All seed partially certified in one East African Community member state, and moved to another state to complete the process of certification; including processing, labeling or sealing, shall bear an inter-agency certification label.

(3) All seeds produced under inter-agency seed certification shall meet the minimum field and laboratory standards, specified in the Sixth Schedule, and shall be accompanied by Form SR 21, specified in the Third Schedule during seed transfer.

PART XV - ACCREDITATION

Accreditation

46. (1) The Board shall be responsible for accrediting individuals, companies or institutions to carry out field inspection, laboratory seed testing, seed sampling and seed labeling.

(2) A person who intends to be accredited for any of the seed certification activities in sub-regulation (1) shall be required to meet the following requirements:-

(i) have relevant training with a minimum diploma in agriculture or seed technology;
(ii) have adequate skills and work experience;
(iii) have letters of reference from reputable institutions or person; and
(iv) be conversant with the country’s seed laws and regulations.
Conditions for Accreditation

47. (1) The following conditions shall be fulfilled for the Accreditation:-

(a) Laboratory Seed testing

(i) be an established laboratory with the necessary equipment;
(ii) have technically competent staff;
(iii) have competence in seed testing protocols;
(iv) posses seed testing and quality assurance manuals; and
(v) have capacity to handle varying volumes of work.

(b) Seed Sampling

The requirements for seed sampling include the following-
(i) staff should be familiar with sampling procedures documented in manuals;
(ii) should have the right sampling equipment;
(iii) should have appropriate sample packaging material;
(iv) should have suitable sample storage facilities.

© Field Inspection

The staff must have the following-
(i) competence in field inspection skills;
(ii) inspection manuals;
(iii) appropriate inspection kits.

(d) Seed labeling

The staff must have the following-
(i) competence in seed labeling;
(ii) appropriate labeling equipment in place.

Accreditation Procedures

48. (1) A person, company or institution intending to be accredited for any of the seed certification activities in regulation 46 shall apply to the Board in Form SR 22, specified in the Third Schedule.

(2) The applicant shall state in the application the scope of the accreditation services.

(3) The Board shall, on receipt of the application-
(i) review submitted application forms;

(ii) carry out preliminary evaluation of documents to assess the technical competence of the applicant;

(iii) conduct an on-site evaluation of the applicant;

(iv) produce an evaluation report on the applicant.

(4) The Board shall notify a successful applicant, by issuing a Certificate of registration in Form SR 23, specified in the Third.

(5) The Board shall carry out periodic auditing of accredited persons to assess their competence, in execution of their duties.

(6) The assessment shall be done by inspecting or testing at least 10 per centum of the fields or samples as the case may be.

(7) An accredited person, company or institution shall lose accreditation status whenever found to be incompetent during two subsequent audits, and shall be required to re-apply to the Board to seek for re-accreditation.

Register of Accredited entities

49. (1) The Secretary shall keep and maintain a register of accredited entities.

(2) The Secretary shall as soon as practicable, after the coming into force of these Regulations update the register of accredited entities taking into account matters provided for by these Regulations.

PART XVI – Offences and Penalties

50. (1) Any person who-

(a) with intent to defraud, gives false information to a seed inspector or seed analyst;
(b) obstructs or interferes with or fails to comply with any lawful order given by a seed inspector in execution of his powers or duties under these Regulations;
© makes or causes to be made any statement or certificate required to be produced or displayed under these Regulations which is false in any material particular;
(d) sells or exposes for sale any seed which does not correspond with the description in any certificate required to be produced or displayed under these Regulations; or
(e) contravenes any of the requirements of these Regulations commits an offence.

(2) Any person who commits an offence under these regulations is liable to a fine not exceeding ninety six currency points or to imprisonment for a term not exceeding four years or both the fine and imprisonment.

PART XVII - APPEALS

The Seeds and Plant Tribunal

51. (1) There is hereby established a Seeds and Plant Tribunal, in accordance with Section 16 of the Act.

(2) The Minister shall, in consultation with the Board, constitute the seeds and plant tribunal.

(3) The seeds and plant tribunal shall be composed of three members as follows:-

(a) The chairman of the tribunal, who shall be an advocate
(b) Two other members from a panel of persons consisting of-
    (a) persons who have a wide general knowledge of agriculture and seed technology.
    (b) persons who have specialized knowledge of particular species of plants.
(4) The Minister may revoke the appointment of members of the tribunal on any of the following grounds-
(a) inability to perform the functions of his or her office arising out of physical
(b) misbehavior or misconduct; or
© incompetence.

Appeals to the Seeds and Plant Tribunal

52. (1) Any person aggrieved by the decision of a seed inspector or seed analyst may appeal within twenty four hours to the Board.

(2) Any person aggrieved by the decision of the Board may appeal to the seeds and plant tribunal, established under Regulation 51.
(3) Any person aggrieved by the decision of the tribunal may appeal to the High Court.

PART XVIII – MISCELLANEOUS

protection of officers from civil action

53. (1) a suit, prosecution or other legal proceedings shall lie against any officer for anything done in good faith and without negligence in the exercise or performance of his or her functions or duties under these Regulations.

(2) For the purposes of this Regulation, the term “Officer” includes any employee of the Government of Uganda.

(3) An officer shall not be exempted under this provision if the officer is negligent in execution of his or her duties.

APPLICATION FOR REGISTRATION AS SEED MERCHANT

(In accordance with the Seeds and Plant Act 2006)

TO: The Secretary
    National Seed Board

Name of Applicant

Address

Location of premises

Years of experience

I/We wish to apply for a certificate as a Seed Merchant.

I/We wish to deal in:-

1. Production of
   (i) Agricultural crops
   (ii) Horticultural Crops
   (iii) others (specify)

2. Processing of
   (i) Agricultural crops
   (ii) Horticultural Crops
   (iii) others (specify)

3. Marketing of
   (i) Agricultural crops
   (ii) Horticultural Crops
   (iii) others (specify)

Merchant

(i) Do you have adequate and knowledgeable personnel who are conversant with seed matters? Yes/No*
Production

(i) Do you have adequate land and equipment to handle basic seed? Yes/No*

(ii) Do you have contractual agreement with the growers you have recruited? Yes/No*

(iii) Do you have adequate field officers to supervise and advise growers on all operations of seed production? Yes/No*

(iv) 

(v) Do you have adequate and knowledgeable personnel who are conversant with seed matters? Yes/No*

(vi) What is your source of breeder seed?

(vii) What is your source of basic seed?

(viii) Do you have adequate land for production of basic seed? Yes/No*

(ix) Do you have contractual agreement with the growers you have recruited? Yes/No*

(x) Do you have an internal quality control programme Yes/No*

Declaration

I/We* AT ANY TIME DURING OFFICIAL WORKING HOURS EVEN WITHOUT Previous appointment will allow the inspectors entry to the seed stores and thereby provide them with the facilities necessary to carry out their inspection work as laid out in the Seed Regulations. I/We* further declare that I/We* am/are*conversant with seed regulations and shall observe the various clauses and conditions of the Regulations. In addition I/We * will send a list of all seed lots in our stores on .................. and .................. or at such a date as can be mutually agreed upon between the NSCS and ourselves.

**HYBRID SEED PRODUCTION**

**MAIZE**

b. detasseling of female plants shall be inspected at least three times during the detasseling period.

c. If 1% or more of the female plants have receptive silk and more that one per a hundred of them are shedding pollen at any one inspection visits, or more than two per a hundred cumulatively during three days of inspection (three inspection visits), then the crop shall be rejected.

d. If more than 50% of the female plants are silking and male plants are not shedding pollen in the field, then the field shall be rejected.

e. The seed crop adjacent to a rejected seed crop shall also be rejected if;

   a) the female plants shedding pollen in the rejected field exceeds either two per a hundred on any one inspection or four per a hundred or a combination of three visits.
b) The field crop shall have more than two per a hundred off types in its pollen parent.

c) The rejected neighboring crop has more than two smutted plants per hectare.

d) The neighboring seed crop adjacent to a rejected crop shall not be rejected if isolation is in accordance with these regulations; and

e) All seed fields shall have eight male guard rows around the seed field.

**SUNFLOWER**

When 2% (certified and above) and 5% (certified) of the female plants have pollen receptive flowers, there should not be more than the number of off type plants stated in the schedule and also not more than five plants per one thousand female pollen shedders (certified and above) or ten plants per one thousand female pollen shedders (certified).
### B. FACTORY SEED PROCESSING STANDARDS

</tbody>
</table>

**Key:**
- LF = Large flat grains
- LR = Large round grains
- MR = Medium round grains
- MF = Medium flat grains
- HF = Hand planting

**Note:**
1. **Maize**
   A seed lot shall not be allowed to contain more than 2.5% of cracked, diseased, shriveled seeds, cob pieces and debris.

2. **Wheat, Barley, Triticale**
   (a) Mixtures with other crop seeds
   A maximum of one seed per litre will be allowed in Pre-basic and Basic seed lots, and four seeds per litre for certified seed lots.

   (b) Weed Seeds
   A maximum of two seeds per litre will be allowed in Pre-basic and Basic seed lots, and four seeds per litre for certified seed lots. No seed of wild oats or Thorn apple or other noxious weeds shall be allowed.

© Damaged Seeds
(i) In Pre- Basic and Basic seed lots, a maximum of 5% of naked seeds and 5% of cracked seeds in barley shall be allowed, while for certified seed, the maximum will be 10%.

(ii) In Pre- Basic and Basic seed lots, a maximum of 5% of all discolored seeds e.g. blue pointed seeds (germ end) and 5% of insect damaged seeds shall be allowed, while for certified seed, the maximum will be 10%.

(d) Sprouted Seeds

In Pre- Basic and Basic seed lots, a maximum of 5% short sprouts and 2% long sprouts will be allowed, while a maximum of 10% short sprouts and 5% long sprouts will be allowed in certified seed lots.

(e) The combination of the factors mentioned in © and (d) above shall not exceed 5% for basic seed (and above) and 10% for certified seed.

3. Sunflower

(i) Mixtures with other varieties- maximum of 2 seeds per litre allowed.

(ii) Seeds with cracked seed coat – maximum of 5% allowed; and

(iii) Noxious weed seeds e.g. Datura sp. – none will be allowed.

4. Beans, Peas, cowpeas, groundnuts and Soybean

(a) Mixture with other crop seeds – none allowed in Pre- basic and basic seed while a maximum of one seed per litre of clearly distinguishable other bean seeds will be allowed for certified seed, but seeds of other species will not be allowed.

(b) Weed seeds – free from all weed seeds.

© Other factors:-

(i) Spotted beans and heat damaged beans – maximum 0.5% allowed;
(ii) Rejects (insect damaged beans, off- colored beans, beans with cracked skin, broken beans, under-size seeds etc. – maximum 3% allowed.
5. **Sorghum, Bulrush millet and Finger millet**

(a) Mixtures with other crop seeds – none will be allowed in Pre- Basic and Basic seed lots, and two seeds per litre in certified seed lots.

(b) Weed seeds – A maximum of two seeds per litre will be allowed in Pre- Basic and Basic seed lots, while four seeds will be allowed in certified seed lots. No seed of wild oats, thorn apple, striga, orobanche or other noxious weeds shall be allowed.

6. **Irish Potato**

The following diseases/abnormalities will be permitted up to the stated tolerances:

<table>
<thead>
<tr>
<th>Disease/Abnormality</th>
<th>Tolerance (tubers per 50 kg bag)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Basic</strong></td>
</tr>
<tr>
<td>Scab (Streptomyces sp.)</td>

<td>0%</td>
</tr>
<tr>
<td>Severe tuber moth</td>
<td>2%</td>
</tr>
<tr>
<td>Mis-shapen and damaged tubers</td>
<td>0%</td>
</tr>
</tbody>
</table>

7. **Maximum Weight of Lots**

Generally, the following shall be the maximum weights which constitute a seed lot:-

(a) for seed whose size is less than that of Triticum spp. (2.2 mm) - 10,000 kgs.

(b) for seed whose size i.e. equal to or larger than that of Triticum spp. (2.2mm) 25,000 kgs, and
© in case of maize – 40,000 kgs.
